

TECHNICAL BULLETIN - #A607  
SUBJECT: #5150-L MODULE W/FLYING LEADS  
Effective Date: 07/01/06

The 005150-L module is used in some applications that do not use the strobe (+), purple lead, and the strobe (-), green lead. One of these applications is the 005155K, the retrofit kit for 5 series crossing arm. Another would be the 005151, kit-5.5 replacement module, for any stop arm with incandescent lights on the blade, basically most non-strobe light arms. For the above noted applications please insulate the strobe (+), purple lead, and the strobe (-), green lead shown in **Figure 1** below.

**Figure 1**

**PURPLE wire**
